PURPOSE AND SCOPE OF REPORT:

PURPOSE

The purpose of this document is to report to the customer the appraiser's opinion of the overall condition of the subject vehicle.

MINIMUM DIMINISHED VALUE

The Minimum Diminished Value of the vehicle is described as the minimum amount of money that an automobile is estimated to have depreciated in value, due to a particular accident, mishap, event or circumstance and is based on wholesale market pricing and the standard sliding scale established by the International Society of Automotive Appraisers or a fair market offer to purchase after the date of loss.

FAIR MARKET VALUE

The Fair Market Value of the vehicle is the highest price on the date of valuation that would be agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available.

REPLACEMENT VALUE

The replacement value of a vehicle is defined as the actual total cost of exactly duplicating the vehicle if it were subject to a total loss. In the case of a customized or modified vehicle this must also include the cost of obtaining an identical type of 'donor' or 'base' vehicle, the cost of obtaining all of the additional aftermarket and specialty components along with all labor costs incurred to replicate the loss vehicle.

FAIR MARKET VALUE PRIOR TO LOSS

The Fair Market Value of the vehicle Prior To Loss is the highest price on that prior noted date of valuation that would have been agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available immediately prior to the known loss date of that vehicle.

METHOD OF VALUATION

The value is estimated by current market data comparison, supplemented by cost information. The vehicle is compared when possible, with others for sale and that have sold in the general time period. Adjustments are made for differences in equipment, mileage, cosmetics, conversions, originality, condition as well as sale terms and current economic conditions at time of sale.

ASSUMPTIONS AND LIMITING CONDITIONS

This report has been prepared and issued only to the person named on the cover, and no other persons should rely on this report.

Information including, vehicle identification numbers, serial numbers, engine numbers, engine size, component serial numbers, color codes, paint codes, trim codes, component stampings, door tags, fender tags, cowl tags, date codes, badges, emblems, owner history and mileage information provided by the owners or parties to sell or others, or displayed on the appraised vehicle or components are assumed to be reliable, correct and truthful, as accuracy is not checked or guaranteed for originality or authenticity.

NOTES:

On the date appraised, this 2000 Pontiac Trans Am WS-6 represents an excellent example of a modern custom fabricated Show Car 2-Dr Sport Coupe conversion.

While retaining the basic external looks and characteristics of this 16 year old automobile, this rare '00 Trans Am WS-6 now features virtually all the options and creature comforts that you might expect to find in a modern dragster.

This 2000 Pontiac Trans Am WS-6 was built as a SEMA show car. It has been on the cover of GM High-Tech magazine as the feature car. The paint is the first item that catches your eye with the beautiful one of a kind graphics and the Flip Flop pearlescent with many coats of clear polished to a water like shine.

The next thing is the performance potential supported by a V8 pumped by a Vortech super charger and backed by a T-56 5-speed manual transmission. To handle the power to the pavement is an engineered suspension using Center Force clutch, Eibach Springs and Hotchkis suspension and out the Racing Hart M5 18" alloy wheels wrapped in BF Goodrich ZR rated tires.

The interior offers all the comfort features of the original Trans Am but with added matching trim pieces, boost gauge, high-end audio, five-point safety harness, roll cage and racing helmet make this Show Car truly unique.

As noted on the extensive Vehicle Option pages, and as depicted on the many enclosed digital photographs, this unique '00 Trans Am was custom fabricated using the finest components available.

The caliber of all work performed on this vehicle is of the highest quality, the entire vehicle is both highly detailed as well as being extremely well finished.

The replacement value of this 2000 Pontiac Trans Am WS-6 is based on the average asking price of suitable recipient vehicles available in the market place and credited for the materials and labor required to replicated the noted options and customizations. The replacement value does not include tax, title or registration fees.
