## **PURPOSE AND SCOPE OF REPORT:**

### **PURPOSE**

The purpose of this document is to report to the customer the appraiser's opinion of the overall condition of the subject vehicle.

### **MINIMUM DIMINISHED VALUE**

The Minimum Diminished Value of the vehicle is described as the minimum amount of money that an automobile is estimated to have depreciated in value, due to a particular accident, mishap, event or circumstance and is based on wholesale market pricing and the standard sliding scale established by the International Society of Automotive Appraisers or a fair market offer to purchase after the date of loss.

### **FAIR MARKET VALUE**

The Fair Market Value of the vehicle is the highest price on the date of valuation that would be agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available.

### **REPLACEMENT VALUE**

The replacement value of a vehicle is defined as the actual total cost of exactly duplicating the vehicle if it were subject to a total loss. In the case of a customized or modified vehicle this must also include the cost of obtaining an identical type of 'donor' or 'base' vehicle, the cost of obtaining all of the additional aftermarket and specialty components along with all labor costs incurred to replicate the loss vehicle.

### **FAIR MARKET VALUE PRIOR TO LOSS**

The Fair Market Value of the vehicle Prior To Loss is the highest price on that prior noted date of valuation that would have been agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available immediately prior to the known loss date of that vehicle.

### **METHOD OF VALUATION**

The value is estimated by current market data comparison, supplemented by cost information. The vehicle is compared when possible, with others for sale and that have sold in the general time period. Adjustments are made for differences in equipment, mileage, cosmetics, conversions, originality, condition as well as sale terms and current economic conditions at time of sale.

### **ASSUMPTIONS AND LIMITING CONDITIONS**

### **NOTES:**

On the date appraised, this 1932 Ford Model B represents an excellent example of a traditional Hot Rod Tudor Sedan conversion.

While retaining the basic external looks and characteristics of this 83 year old classic automobile, this rare '32 Tudor looks just as if it were custom fabricated way back in the late fifties and early sixties.

With features such as a high performance 351 CID V-8 motor, 4-speed automatic transmission, power 4-wheel disc brakes, independent 4-wheel suspension and a custom Tuck and Roll upholstered interior this Hot Rod is built for performance.

As noted on the extensive Vehicle Option pages, and as depicted on the many enclosed digital photographs, this '32 Tudor Sedan Hot Rod was custom fabricated using the many of the finest modern components available, while at the same time being custom built with the quality modern components.

The caliber of all work performed on this vehicle is of the highest quality, the entire vehicle is both highly detailed and extremely well finished.

The fair market value of this 1932 Ford Model B is based on the average asking and selling price of similar vehicles available in the market place and credited for the noted options and customizations. The fair market value does not include tax, title or registration fees.
