**APPRAISAL REPORT: 1937 Ford 1/2-Ton Pickup Truck**

**To Whom It May Concern:**

In compliance with the recent request, we have appraised the above referenced vehicle.

We have enclosed the limited appraisal report that constitutes our analysis and conclusion of the research completed on this vehicle.

The Replacement Value of this vehicle, as of the date specified herein was; **\$35,700.00**

Thank you very much for your business, and if you should have any further questions, please do not hesitate to call.

Very truly yours,

  
Jerry Roberts  
Appraiser, Auto Appraisal Network, Tulsa

## **PURPOSE AND SCOPE OF REPORT:**

### **PURPOSE**

The purpose of this document is to report to the customer the appraiser's opinion of the overall condition of the subject vehicle.

### **MINIMUM DIMINISHED VALUE**

The Minimum Diminished Value of the vehicle is described as the minimum amount of money that an automobile is estimated to have depreciated in value, due to a particular accident, mishap, event or circumstance and is based on wholesale market pricing and the standard sliding scale established by the International Society of Automotive Appraisers or a fair market offer to purchase after the date of loss.

### **FAIR MARKET VALUE**

The Fair Market Value of the vehicle is the highest price on the date of valuation that would be agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available.

### **REPLACEMENT VALUE**

The replacement value of a vehicle is defined as the actual total cost of exactly duplicating the vehicle if it were subject to a total loss. In the case of a customized or modified vehicle this must also include the cost of obtaining an identical type of 'donor' or 'base' vehicle, the cost of obtaining all of the additional aftermarket and specialty components along with all labor costs incurred to replicate the loss vehicle.

### **FAIR MARKET VALUE PRIOR TO LOSS**

The Fair Market Value of the vehicle Prior To Loss is the highest price on that prior noted date of valuation that would have been agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available immediately prior to the known loss date of that vehicle.

### **METHOD OF VALUATION**

The value is estimated by current market data comparison, supplemented by cost information. The vehicle is compared when possible, with others for sale and that have sold in the general time period. Adjustments are made for differences in equipment, mileage, cosmetics, conversions, originality, condition as well as sale terms and current economic conditions at time of sale.

### **ASSUMPTIONS AND LIMITING CONDITIONS**

Information including, vehicle identification numbers, serial numbers, engine numbers, engine size, component serial numbers, color codes, paint codes, trim codes, component stampings, door tags, fender tags, cowl tags, date codes, badges, emblems, owner history and mileage information provided by the owners or parties to sell or others, or displayed on the appraised vehicle or components are assumed to be reliable, correct and truthful, as accuracy is not checked or guaranteed for originality or authenticity.

Although Auto Appraisal Network has an extensive library, we do not have direct access to specific manufacturer's records, log books, files, computer data bases or other non published information.

Unless the client particularly asks for this in writing, and agrees to absorb any additional cost in obtaining, no such effort will be made in contacting manufacturers, automotive groups, clubs, historians, etc. in order to acquire such information.

## **ADDITIONAL COMMENTS**

### **MECHANICAL:**

It is at the appraiser and vehicle owner's discretion to test drive the subject vehicle. Test driving the vehicle does not constitute a guarantee of the current or future operational status or functionality of any mechanical, hydraulic, electrical or computer systems featured on the subject vehicle. Auto Appraisal Networks recommends that our customers contact an ASE Certified mechanic to perform such tests as needed. The types of problems encountered in older, classic and customized vehicles can be easily masked or hidden.

### **NOTES:**

On the date appraised, this 1937 Ford 1/2-Ton Pickup represents an excellent example of a modern Custom fabricated classic Truck conversion.

While retaining the basic external looks and characteristics of this 76 year old classic pick up, this rare '37 Pickup now features virtually all the options and creature comforts that you might expect to find in a modern high performance sports truck.

Features such as a high performance 350 cu.in. V8 motor, Turbo 350 automatic transmission, power front disc brakes, independent front suspension with power rack & pinion steering, Vintage Air air conditioning, power steering, power brakes, power windows, a luxury upholstered interior, and a multi speaker CD stereo system mounted in an overhead console make this custom Truck truly unique.

As noted on the extensive Custom Truck Conversion pages, and as depicted on the many enclosed digital photographs, this classic Truck was custom fabricated using the finest components available.

The caliber of all work performed on this pick up is of the highest quality, the entire vehicle is both highly detailed, and extremely well finished.

The replacement value of this 1937 Ford is based upon the average asking price of suitable replacement vehicles available in the marketplace. The replacement value does not include, tax, title, or registration fees.
