PURPOSE AND SCOPE OF REPORT:

PURPOSE

The purpose of this document is to report to the customer the appraiser's opinion of the overall condition of the subject vehicle.

MINIMUM DIMINISHED VALUE

The Minimum Diminished Value of the vehicle is described as the minimum amount of money that an automobile is estimated to have depreciated in value, due to a particular accident, mishap, event or circumstance and is based on wholesale market pricing and the standard sliding scale established by the International Society of Automotive Appraisers or a fair market offer to purchase after the date of loss.

FAIR MARKET VALUE

The Fair Market Value of the vehicle is the highest price on the date of valuation that would be agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available.

REPLACEMENT VALUE

The replacement value of a vehicle is defined as the actual total cost of exactly duplicating the vehicle if it were subject to a total loss. In the case of a customized or modified vehicle this must also include the cost of obtaining an identical type of 'donor' or 'base' vehicle, the cost of obtaining all of the additional aftermarket and specialty components along with all labor costs incurred to replicate the loss vehicle.

FAIR MARKET VALUE PRIOR TO LOSS

The Fair Market Value of the vehicle Prior To Loss is the highest price on that prior noted date of valuation that would have been agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available immediately prior to the known loss date of that vehicle.

METHOD OF VALUATION

The value is estimated by current market data comparison, supplemented by cost information. The vehicle is compared when possible, with others for sale and that have sold in the general time period. Adjustments are made for differences in equipment, mileage, cosmetics, conversions, originality, condition as well as sale terms and current economic conditions at time of sale.

ASSUMPTIONS AND LIMITING CONDITIONS

Information including, vehicle identification numbers, serial numbers, engine numbers, engine size, component serial numbers, color codes, paint codes, trim codes, component stampings, door tags, fender tags, cowl tags, date codes, badges, emblems, owner history and mileage information provided by the owners or parties to sell or others, or displayed on the appraised vehicle or components are assumed to be reliable, correct and truthful, as accuracy is not checked or guaranteed for originality or authenticity.

Although Auto Appraisal Network has an extensive library, we do not have direct access to specific manufacturer's records, log books, files, computer data bases or other non published information.

Unless the client particularly asks for this in writing, and agrees to absorb any additional cost in obtaining, no such effort will be made in contacting manufacturers, automotive groups, clubs, historians, etc. in order to acquire such information.

NOTES:

On the date appraised, this 1990 Ford Bronco represents an excellent example of a modern Custom SUV conversion.

If Ford had teamed with Harley-Davidson on a Bronco build this would be the result. What you see here is a supercharged, fully custom, frame-off restoration of a 1990 Ford Bronco built to cruise or show. No part of this vehicle went untouched, everything was replaced or restored by a full service body shop. It has won in it's class and "Best of Show" in 80's to 90's at Fort Worth's 2012 Yellow Rose, Ford Only, Car Show. It also won "Best in Class" at the 2012 Dallas Autorama. The Harley-Davidson theme has be carried out from exterior to the interior in this a truly one of a kind build.

While retaining the basic external looks and characteristics of this 22 year old sport utility, this custom '90 Bronco has been custom fabricated with the addition of the latest modern technology, while at the same time being Custom built with the quality modern components.

The caliber of all work performed on this vehicle is of the highest quality, the entire vehicle both highly detailed as well as being extremely well finished.

The replacement value of this 1990 Ford Bronco is based on the average asking price of suitable donor vehicles and credited for the documented materials and labor to replicate the noted options and customizations. The replacement value does not include tax, title or registration fees.
