## **PURPOSE AND SCOPE OF REPORT:**

### **PURPOSE**

The purpose of this document is to report to the customer the appraiser's opinion of the overall condition of the subject vehicle.

### **MINIMUM DIMINISHED VALUE**

The Minimum Diminished Value of the vehicle is described as the minimum amount of money that an automobile is estimated to have depreciated in value, due to a particular accident, mishap, event or circumstance and is based on wholesale market pricing and the standard sliding scale established by the International Society of Automotive Appraisers or a fair market offer to purchase after the date of loss.

### **FAIR MARKET VALUE**

The Fair Market Value of the vehicle is the highest price on the date of valuation that would be agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available.

### **REPLACEMENT VALUE**

The replacement value of a vehicle is defined as the actual total cost of exactly duplicating the vehicle if it were subject to a total loss. In the case of a customized or modified vehicle this must also include the cost of obtaining an identical type of 'donor' or 'base' vehicle, the cost of obtaining all of the additional aftermarket and specialty components along with all labor costs incurred to replicate the loss vehicle.

### **FAIR MARKET VALUE PRIOR TO LOSS**

The Fair Market Value of the vehicle Prior To Loss is the highest price on that prior noted date of valuation that would have been agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available immediately prior to the known loss date of that vehicle.

### **METHOD OF VALUATION**

The value is estimated by current market data comparison, supplemented by cost information. The vehicle is compared when possible, with others for sale and that have sold in the general time period. Adjustments are made for differences in equipment, mileage, cosmetics, conversions, originality, condition as well as sale terms and current economic conditions at time of sale.

### **ASSUMPTIONS AND LIMITING CONDITIONS**

Information including, vehicle identification numbers, serial numbers, engine numbers, engine size, component serial numbers, color codes, paint codes, trim codes, component stampings, door tags, fender tags, cowl tags, date codes, badges, emblems, owner history and mileage information provided by the owners or parties to sell or others, or displayed on the appraised vehicle or components are assumed to be reliable, correct and truthful, as accuracy is not checked or guaranteed for originality or authenticity.

Although Auto Appraisal Network has an extensive library, we do not have direct access to specific manufacturer's records, log books, files, computer data bases or other non published information.

Unless the client particularly asks for this in writing, and agrees to absorb any additional cost in obtaining, no such effort will be made in contacting manufacturers, automotive groups, clubs, historians, etc. in order to acquire such information.

This narrative is an attempt to determine Replacement Value of this vehicle, as of the noted date of:

## **ADDITIONAL COMMENTS**

### **MECHANICAL:**

It is at the appraiser and vehicle owner's discretion to test drive the subject vehicle. Test driving the vehicle does not constitute a guarantee of the current or future operational status or functionality of any mechanical, hydraulic, electrical or computer systems featured on the subject vehicle. Auto Appraisal Networks recommends that our customers contact an ASE Certified mechanic to perform such tests as needed. The types of problems encountered in older, classic and customized vehicles can be easily masked or hidden.

### **NOTES:**

On the date appraised, this 2012 Ford Mustang GT represents an excellent example of an American Sports car custom tuned and modified for performance.

The UTI / Tjin Edition Ford Mustang was one of the display vehicles on the 2012 Tjin Edition RoadShow. The DuPont Candy Orange paint, meticulously applied by L&R Auto Body, really stands out against the matte-black 20-inch Forgestar CF10 wheels wrapped in Falken FK-452 tires, while the Wraptivo carbon-fiber accents are perfect finishing touches on the Street Scene carbon-fiber body kit.

An Air Lift airbag setup has been installed in place of traditional shocks and springs and the big, six-piston Baer brakes with custom yellow calipers also tie in nicely with the other yellow accents throughout the car, including the wheel lip pinstripes, tinted LightWurkz HID foglights, Unique Fabrication strut tower brace, steering wheel, and a yellow-and-black leather diamond-stitched interior.

The 2012 Fox-body Mustang convertible has remarkable rigidity that's been further enhanced by a Classic Design Concepts harness and light bar. The interior includes Realm amps, subs, mids, and highs along with a Pioneer head unit and a Scosche trim panel and wiring (powered by Braille carbon-fiber batteries).

As noted on the extensive Vehicle Option pages, and as depicted on the many enclosed digital photographs, this unique automobile was custom fabricated using the finest components available.

The caliber of all work performed on this vehicle is of the highest quality, the entire vehicle is both highly detailed as well as being extremely well finished by UTI and Tjin Edition. The estimate cost to build this one-off custom car is estimated to be \$75,000.

The fair market value of this 2012 Ford Mustang is based upon the average asking price of similar vehicles available in the marketplace. Allowances have been made for the noted options and condition. The fair market value does not include tax, title or registration fees.
